7100 4T 20W-50
High Performance Motorcycle Lubricant
100% Synthetic - Ester

TYPE OF USE
High performance bikes, sports bikes, street & road bikes, trails, off road bikes, enduro, trial...fitted with 4 stroke engines, integrated gearbox or not, wet or dry clutch, engines meeting Euro 2, 3, 4 or 5 emission regulation, fitted with exhaust gas after treatment systems: catalytic converters, air injection into exhaust pipe...
Grade 50 at high temperature especially suitable for big bore engines thumpers, twins…
Other uses: street bikes without catalytic converters, scooters, ATV's, UTV's…

PERFORMANCE
STANDARDS API SN / SM / SL / SJ / SH / SG
SPECIFICATIONS JASO MA2 under N° M033MOT165
Meets Harley Davidson specifications

Protection
Ester Technology:
- Low traction coefficient Ester to minimize engine internal friction losses and improve performance.
- Synergy of Ester with anti-wear additives and improved shear resistance for improved gear protection and life time.

100% Synthetic lubricant for improved oil film resistance at high temperatures and high revs.
Optimized Phosphorus and Sulfur content (JASO MA2 < 1200 ppm) for better operating conditions of catalytic converters.
The innovative anti-wear additives package provides outstanding gearbox protection. FZG Gear Test results: Pass FLS>14. The FZG (Forschungsstelle für Zahnrader und Getriebebau) Test, evaluates fluid lubricating and wear protection properties at the interface of a loaded set of gears. Lubricants are then graded based on their “Failure Load Stage” or FLS rating from FLS 1 (very poor result) up to FLS 14 (outstanding result).

Comfort
JASO has created its own 4-stroke motorcycle standard -JASO T903- which has three grades MA, MA1 and MA2.
JASO MA2 offers the most efficient friction levels to guarantee the clutch engagement during the three riding modes: Starting, Acceleration and Constant speed.

RECOMMENDATIONS
Drain interval: according to manufacturers’ recommendations and tune to your own use.
Can be mixed with synthetic or mineral lubricants.
