

BRAKE CLEAN

Contact Cleaner

Super powerful non-chlorinated degreaser for brakes

Mechanical system and electrics

Spray

TYPE OF USE

Brakes and clutches

Brake and clutch pad residue.

All mechanical parts and systems

Engine dismantling, levers, axes of brake, clutch mechanisms and shock absorbers, chain stops and adjusters, felloes, oil, grease, tar residue...

Electrical circuits

Electrics, plugs, suppressors...

Plastics, paintwork, varnish

Grand Prix and Superbike teams also use MOTUL BRAKE CLEANER to swiftly remove, rubber and tar residue on the fairing.

Since MOTUL BRAKE CLEANER is very powerful, it is more advisable to test prior to use (on a hidden little area) before using it on plastical material, paintings and varnishes.

PERFORMANCE

Dissolves oil, grease and tar. Leaves no marks. No need to rub.

Evaporates very quickly leaving no marks.

RECOMMENDATIONS

Shake before use.

Spray from a short distance on the areas to be cleaned.

Respray on very dirty areas. Evaporates very quickly.

SECURITY

Refer to the MSDS sheet and the information mentioned on the spray.
